#### Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on September 28, 2007 and December 13, 2007 has been entered.

## Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.
- 3. Claims 1-5 and 8-10 are rejected under 35 U.S.C. 102(a) as being anticipated by Whayne et al. (U.S. Pat. 6,071,279).

Referring mainly to Figures 15A, 17A and 17B, Whayne et al. discloses a guide wire body (106) capable of being inserted through a bore (107,Fig.17B) formed on an appliance (102), and a retainer (100,Fig.17A) extended along the guide wire body, the distal portion (108) being joined to the distal end portion of the guide wire body to prevent relative movement between the each distal end (Fig.17A), wherein the retainer (100) can be arranged outside the bore (107) of the appliance when the guide wire body is in the bore (Fig.17B). As to claims 2, 3

and 9, note element 22 in Fig.17B and col. 8, lines 8-14. As to claim 8, note sheath (102) which surrounds guide wire body (106) forms a insulating (col.13, 21-23) coating around the wire and material (32, Fig.15a) around the retaining wire is "insulating" (col.8, lines 27-30). As to claims 4 and 5, note that tip portion (108) is formed of the same insulating material as (32) which is a soft elastic material and the junction of (106) and (108) is separable (e.g., adhesive or thermal bonding, col.13, lines 8-10). As to claim 10, note catheter sheath (12, Fig.17A) which has an increased diameter.

# Claim Rejections - 35 USC § 103

- 4. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.
- 5. Claims 13 and 14 are rejected under 35 U.S.C. 103(a) as being unpatentable over Whayne et al. in view of Dake et al. (U.S. Pat. 4,927,418).

Whayne et al. disclose a vascular catheter device but fail to disclose the length of the retaining wire. Dake et al. teach that an operable length for a vascular catheter device (which would include elements extending there through) varies depending upon use but can be from about 120 cm to 175 cm (col.3, lines 4-8). It would have been obvious to one of ordinary skill in the art at the time of the invention to have made the device of Whayne et al. a length that would provide operability for its intended purpose, Dake et al. suggesting such length for such intended purpose.

# Allowable Subject Matter

6. Claims 6, 7, 11, 12, 15 and 16 are allowed.

## Response to Arguments

7. Applicant's arguments filed September 28, 2007 and December 13, 2007 have been fully considered but they are not persuasive. Applicant's arguments filed September 28, 2007 are directed to limitations in claim 1 that have been taken out in the amendment filed December 13, 2007. Since the claims can be rejected on the previous grounds and art of record, not issues need to be addressed by the Examiner.

#### Conclusion

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Wilson (U.S. Pat. 5,143,085)

Graves et al. (U.S. Pat. 5,522,819)

9. All claims are drawn to the same invention claimed in the application prior to the entry of the submission under 37 CFR 1.114 and could have been finally rejected on the grounds and art of record in the next Office action if they had been entered in the application prior to entry under 37 CFR 1.114. Accordingly, **THIS ACTION IS MADE FINAL** even though it is a first action after the filing of a request for continued examination and the submission under 37 CFR 1.114.

Art Unit: 3739

See MPEP § 706.07(b). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to John P. Leubecker whose telephone number is (571) 272-4769.

The examiner can normally be reached on Monday through Friday, 6:00 AM to 2:30 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Linda C.M. Dvorak can be reached on (571) 272-4764. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
